

Dosecann is a state-of-the-art manufacturing facility with the primary goal of bringing the best cannabis innovations to domestic and international consumers across medical, natural health and recreational market segments.

Analytical Scientist Lead

Reporting to Chief Science Officer

- Experienced analytical scientist to lead team.
- Plan, perform, interpret and report results of experiments or projects.
- Support process development
- Write process or equipment validation protocols and oversee execution
- Develop and optimise extraction or testing methods for different products
- Perform external audits as required

Analytical Scientists (2) - Reporting to Analytical Scientist Lead

Objectives / Responsibilities:

- Assist in designing, planning and executing all aspects of assigned projects independently through scientific rationale to assist in development of new products per departmental SOPs and guidelines.
- Apply formulation and problem solving skills and utilize all available resources to identify process and /or formulation deficiencies and be proactive in implementation of solutions.

Skills/Prerequisites:

- PhD level candidate (Pharmaceuticals, Natural Health Products)
- Effective time-management skills and ability to multi-task.
Developmental mindset; ability to work independently and troubleshoot issues

Key Responsibilities:

- Perform analysis and collect data pertaining to raw materials, in process materials, finished products and stability samples. Review and discuss conclusions with manager regarding progress of work and effectively communicate information to peers and management in the form of presentations and reports as required.
- Compile all data obtained from testing and observations and complete report summaries. Perform training to peers and junior staff as required.
- Must have some mechanical ability and analytical capability as it applies to running any required ASTM tests.

- Working experience with the following general lab tests including, but not limited to: gas chromatography (GC), high performance liquid chromatography (HPLC), Ion chromatography (IC), inductive coupled plasma (ICP) as well as wet chemistry tests (pH, water content, freezing point etc.).
- Collaborate with other team members and organization members to facilitate knowledge exchange, meet departmental and corporate goals.
- Work according to, and ensure compliance with external and internal guidelines (eg SOP's, GMP, HSE).
- Perform additional related duties as assigned.
