## BIOALLIANCE PARTNERS IN PROSPERITY

We invite you to become part of our vibrant and growing Bioscience Cluster in Prince Edward Island! The BioAlliance is a not-for-profit, industry-led organization made up of industry, research, government, and academic partners committed to building the bioscience industry as a key economic engine in Prince Edward Island. We continue to develop collaborative partnerships among stakeholders locally, regionally, nationally, and internationally who see and experience the benefits of being part of our prosperous bioscience business cluster.

We encourage you to sign up for our Partners in Prosperity program and become a financial supporter of the PEI BioAlliance Inc. Support from private sector partners like you is evidence of the value we bring to the bioscience community and helps to maintain our government agencies' financial commitment for the work ahead.

## CREDIBILITY

- Be part of a community that will open doors to key contacts and establish collaborative relationships to move your business forward
- Benefit from the respected voice that the Prince Edward Island BioAlliance has established

## COMMUNICATIONS

- Be part of the PEI Bioscience Cluster's collective voice with provincial and federal governments on issues such as budgets, economic issues, legislation and infrastructure impacting the sector
- Tap into information and resources garnered through our participation in local, regional, national and international business, communications, and research and development committees and networks
- Get exclusive international market reports, directories and business trend information that will support your growth
- Connect with local, national and international audiences and media networks

## COLLABORATION & COMMERCIALIZATION

- Expand your networks through our international conferences, business forums, bionetworking speaker sessions, trade missions and other business and social events
- Access top talent through our growing HR database
- Establish strategic working partnerships through our extensive networks and committed public and private sector partners
- Take advantage of a network of strategic partners with extensive bioscience industry knowledge that will move your commercialization plans forward
