

Analytical Scientist
Charlottetown, PEI

Dosecann is a Canadian licensed dealer dedicated to developing Cannabis Solutions for the global cannabis industry. Dosecann has assembled a world-class team housed in a purpose-built, 42,000 sqft. GMP compliant facility that will be the hub for cannabis extraction, product innovation and formulation.

About the role

Dosecann is currently seeking an experienced Analytical Scientist in Charlottetown who reports to the Lead Analytical Scientist. The candidate should possess significant chemistry expertise with the ability to provide analytical method development, technical expertise, testing methods for various products, and data analysis to support the development of new products.

With the support of the Lead Analytical Scientist, the Analytical Scientist would be expected to design, plan, and carry out their responsibilities using state-of-the-art analytical chemistry equipment. The candidate will be familiar with the quantitation of analytes using modern mass spectrometry (MS) techniques, the preparation of samples for MS analysis and be able to execute all aspects of assigned projects independently through scientific rationale. The successful candidate will also be able to successfully work in a team environment, interact with external clients and vendors in a courteous manner, and perform their duties in a highly regulated industry utilizing the appropriate departmental SOPs and guidelines.

What can you expect to do

- Become a key member of the Analytical Scientist team at Dosecann.
- Execute and perform analytical testing experiments supporting product development and client needs.
- Perform analysis and collect data pertaining to raw materials, in-process materials, finished products and stability samples. Review and discuss conclusions with the Lead Analytical Scientist regarding progress of work and effectively communicate information to peers and management in the form of presentations and reports as required.
- Apply scientific problem-solving skills and utilize all available resources to proactively implement solutions and adopt industry best practices.
- Compile all data obtained from testing and observations, ensure data quality and complete report summaries.
- Collaborate with other team members and organization members to facilitate knowledge exchange to meet departmental and corporate goals
- Work according to the Dosecann QMS system to ensure compliance with external and internal regulatory guidelines (e.g. SOP's, GMP, HSE).
- Perform additional related duties as assigned.

What we're looking for

- The candidate should possess a Master's degree in Chemistry or equivalent B.Sc. or Biotechnology degree.
- 2-5 years of experience in a testing and/or research laboratory.
- Practical experience using LC-MS, GC-MS and/or ICP-MS for separation and quantitation of natural products and other analytes.

Dosecann Cannabis Solutions

- Experience interpreting results and summarizing results in scientific reports.
- Effective time-management skills and ability to multi-task.
- Developmental mindset; ability to work independently and troubleshoot issues.
- Must have mechanical ability and analytical capability as it applies to running any required ASTM tests.
- In addition to mass spectrometry techniques, work experience with general lab tests including, but not limited to: high performance liquid chromatography (HPLC, UPLC and/or Prep HPLC), as well as wet chemistry tests (pH, water content, viscosity, freezing point, titrations etc.).

How to apply

Please email your resume and cover letter to careers@dosecann.com and quote “**Analytical Scientist - Dosecann**” in the subject line.

Dosecann is committed to complying with the highest standards of practice in our industry. It is an ongoing condition of employment that all employees comply with these standards and Company Policies and that all employees understand and are equally committed to upholding our commitment to abide by such standards and policies.
