About the role

Reporting to the Director, Analytical Services, Dosecann is currently seeking an Analytical Scientist in Charlottetown, PE. The successful candidate will possess practical Chemistry expertise and would be expected to carry out their responsibilities while using state-of-the-art analytical Chemistry equipment. With the support of the Director, Analytical Services, the Analytical Scientist will prepare samples for analyses, execute analytical and testing protocols for various product formats, and perform data analyses and report findings.

The successful candidate will be familiar with the quantitation of analytes using modern Mass Spectrometry (MS) techniques, the preparation of samples for MS analyses, and be able to execute assigned projects and tasks. They will also be able to successfully work in a team environment, interact with external clients and vendors in a courteous manner, and perform their duties in a highly regulated industry utilizing the appropriate departmental Standard Operating Procedures (SOP's) and Dosecann LD guidelines.

What can you expect to do?

- Embody Auxly and Dosecann LD's mission, and strategy, and act in a responsible, ethical, and honest manner while consistently leading by example.
- Become a key member of the Analytical Services team at Dosecann.
- Execute and perform analytical testing experiments in support of product development and client needs.
- Develop and validate analytical methodology using a range of analytical instrumentation.
- Perform analysis and collect data pertaining to raw materials, in process materials, finished products and stability samples.
- Plan, perform, and interpret results of experiments and projects, ensure data quality and complete report summaries.
- Communicate progress of work to peers and managers in the form of presentations and reports as required.
- Apply scientific problem-solving skills and utilize all available resources to proactively implement solutions and adopt industry best practices.
- Work according to the Dosecann QMS system to ensure compliance with external and internal regulatory guidelines (e.g. SOP's, GMP, HSE).
- Perform additional related duties as assigned and as operationally required.

What you bring to the table

- Graduate degree in Analytical Sciences, a B.Sc. or Biotechnology degree with 3+ years' experience in a testing and/or research laboratory.
- Previous practical experience with ICP-MS.
- Experience interpreting results and summarizing results in scientific reports.
- Effective time-management skills and ability to multi-task.
- Ability to work collaboratively in a fast-paced environment.
- Continuous Improvement mindset: ability to troubleshoot issues, foresee problems and proactively seek solutions.
- Must have aptitude and analytical abilities as it applies to running standardized methods such as ASTM tests.

Dosecann

What will set you apart

- Extensive experience using LC-MS/MS, GC-MS/MS and/or ICP-MS for separation and/or quantitation of natural products and other analytes.
- Experience with development and validation of analytical methodology.
- In addition to mass spectrometry techniques, work experience with general lab tests including, but not limited to high performance liquid chromatography (HPLC, UPLC and/or Prep HPLC), sample preparation, as well as wet chemistry tests (pH, water content, viscosity, freezing point, titrations etc.)
- Significant experience sourcing, interpreting, establishing, and running ASTM or Pharmacopeial analytical methods.
- Practical experience working with internal and external clients in a courteous and effective manner.

Research shows that while men apply to jobs when they meet an average of 60% of the criteria, women and other marginalized folks tend to only apply when they check every box. Think you have what it takes, but not sure you check every box? Apply to the role anyways. We would love to talk and determine together whether you could be a great fit.

How to apply

Please apply to the opening on the Dosecann careers site and email your resume and cover letter to careers@dosecann.com and quote “**Analytical Scientist - Dosecann**” in the subject line.

How we hire

Dosecann is an equal opportunity employer and encourages applications from all qualified individuals. We thank all applicants for their interest, however, only those selected for an interview will be contacted.

We provide accommodation for job applicants with disabilities during the recruitment process in accordance with applicable laws. Please contact us to request accommodation.
