

Lab Technician

Pegasus Biotech Inc. is an agile biotech company focused in providing high quality vaccine (DNA, autogenous, rProtein, VLPs) development services to the human and animal health sectors as well as developing accurate and reliable analytical testing methods for the human and animal health industry. Our areas of expertise include cell culture/fermentation and purification process development, analytical assay development, veterinary biologic product development and regulatory submission (EMA, CFIA, FDA, USDA), point-of-care and clinical diagnostic instrument and assay development, GLP/GMP lab quality standards and HSE.

Title: Lab Technician

Posted Date: 18Feb21

Location: Charlottetown, PEI

Salary: Compensation depends on qualifications and experience.

Job Description:

The lab technician will be responsible for assisting senior scientists in executing process development and analytical development projects for clients. Tasks will include:

- Preparation of buffers and solutions
- Running assays (ELISA, QPCR, HPLC, etc.) as following established protocols
- Maintaining accurate records of experiments.
- Maintenance of lab equipment
- Writing lab SOP's
- Data analysis
- Routine purification of biologics
- Other duties as required.

Qualifications:

- Undergraduate degree or college diploma in a related field.
- Lab experience with ELISA, QPCR, SDS-PAGE, cell culture, fermentation and/or HPLC would be considered an asset.
- Highly motivated and interested in learning new skills.
- Detail-oriented.
