

## **COMPANY DESCRIPTION**

Somru Bioscience Inc. is a biotechnology company dedicated to developing breakthrough antibody technology for research, diagnostic and therapeutic applications. The company utilizes a unique and proprietary Somru<sup>™</sup> technology which produces antibodies with superior binding affinity and bioactivity in a wide variety of biological assays in a short period of time. We also offer a wide range of quality reagents for research and diagnostics applications as well as for biosimilar research and development.

## Job Title:

Web Application Developer (Angular)

### Job Duties:

- Develop high-quality user interfaces using JavaScript and Angular.
- Design, develop, and deliver web applications within an Agile framework.
- Undertake complex product analysis and development, involving extensive research and analysis.
- Make informed decisions on technical and design aspects of projects.
- Actively participate in design discussions, providing insightful feedback throughout the development process.
- Collaborate with cross-functional teams to ensure application performance and reliability.
- Troubleshoot and resolve issues in both front-end and back-end code.
- Provide technical support to remove bottlenecks and resolve obstacles.
- Integrate with third-party APIs and services.
- Estimate development time for new application features.
- Analyze and resolve production issues.

- Manage the entire development lifecycle of one of the existing Angular projects, ensuring timely delivery and high quality.
- Serve as a liaison between local and overseas developers to facilitate effective communication and integration of different segments of project work.
- Prioritize and balance multiple project demands, ensuring that deadlines are met while maintaining high standards of quality.
- Engage in proactive problem-solving related to both project management and technical challenges.
- Support continuous improvement by proposing and implementing new processes to enhance team efficiency and effectiveness.

# **Skills and Experience**

- Bachelor's degree in Computer Science or a related field, complemented by software development experience.
- Minimum of 3 years' experience in Angular development.
- Proficiency in JavaScript libraries and frameworks, including Node.js and Express.
- Experience with NoSQL databases (e.g., Firebase, MongoDB), including architecture, modeling, and tool utilization preferable.
- Advanced SQL skills with a proven ability to design, optimize, and maintain relational databases.
- Expertise in Unit Testing for AngularJS using tools like Karma and Jasmine.
- Knowledge of R is a plus.
- Strong understanding of HTML and CSS for creating responsive layouts.
- Experienced with Agile development methodologies.
- Detail-oriented, organized, and meticulous.
- Ability to collaborate effectively with team members.
- Keen interest in emerging technologies, trends, and best practices.
- Proven ability to manage the full lifecycle of a project independently, as each developer currently oversees a separate Angular project.

- Strong problem-solving skills with the capacity to work autonomously and prioritize tasks effectively under tight deadlines.
- Experience in remote team collaboration, especially across time zones, including coordinating and integrating work with overseas developers.
- Excellent communication skills, with the ability to clearly articulate technical challenges and solutions to both technical and non-technical team members.
- Capability to adapt quickly to changing priorities and fluctuating workloads.

# Salary range: \$40,000 - \$60,000
