

Prince Edward Island BioAlliance: Emergence Bioscience Incubator

Position: Supply Chain / CUSMA compliance / Tariff Mitigation Advisor

Location: New Brunswick, supporting Emergence companies across Atlantic Canada

Job Type: Av. 1 day / week through February 2028

The Prince Edward Island BioAlliance is the catalyst of a vibrant and fast-growing partnership of bioscience-based businesses, research and academic institutions, investors, and government agencies powerfully aligned to create an innovation ecosystem focused on technology commercialization and business success.

Emergence, operated by the PEI BioAlliance, is Atlantic Canada's bioscience business incubator dedicated to assisting start-ups and growth-stage companies in commercializing new technologies and services. Emergence provides companies with business incubation services, including mentorship and advisory services, as well as access to networks and resources.

We are looking for a talented Supply Chain Advisor to join the Emergence team to support the company portfolio in navigating geoeconomic shifts / optimizing and professionalizing supply chain activities to support new growth and expansion opportunities.

This position would suit those with a strong lived 'supply chain' experience in scaling companies and those that have an ability to work across several companies concurrently, in a fast paced and responsive manner. This is an excellent opportunity to have a high impact across the life science community in Atlantic Canada. The ability to build credible, productive relationships with clients is important, as well as the ability to provide expert guidance as companies seek to enter and grow their market share / respond to changing market dynamics.

What we're looking for:

- A highly motivated and capable individual, experienced in supply change management / logistics / CUSMA compliance and Tariff navigation strategies, ideally from within an innovative life science environment
- A quality centric and regulatory aware mindset, with experience in raw material / packaging inventory management
- Supporting Emergence clients with their purchasing strategies, import/export activities and product scaling activities
- Advise on the development and implementation of comprehensive supply chain strategies to optimize efficiency, cost and quality
- Support risk management discussions with clients along with the development of contingency plans where appropriate
- Prior experience in a high-growth company setting would be advantageous
- A proven ability to coach, mentor and develop clients as they seek to optimize their supply chain activities

Candidate Profile:

- 10+ years of professional experience as a supply chain professional
- Lived experience supporting small and medium sized companies in the life science space with an awareness of the connectivity of Supply chain activities to Quality and Regulatory related requirements
- MBA, CPIM, SCMP or other professional designations would be an asset
- Import / Export approaches and CUSMA and Tariff navigation related experience desirable
- Act with integrity and confidentiality with regards to client's proprietary knowledge

- Act with a strong sense of urgency whilst ensuring good attention to detail
- Excellent interpersonal skills and the ability to create a strong rapport through both the written and oral form
- A highly collaborative team player who is self-motivated, able to work independently, and who is proactive and thoughtful in their approach to engagement and project delivery
- A passion for supporting the growth of early-stage companies through the challenging commercialization pathway

To Apply:

Please email your cover letter and resume, including the names of two references to joanna@peibioalliance.com with the subject line “Emergence Supply Chain Advisor”
